

## eDiscovery

### Who are we?

Our team consists of experts from both technical and legal backgrounds who can assist at the outset of any litigation proceeding involving electronic discovery.

Our experience in large litigation and document production in all state Supreme Courts, the Federal Court and with regulators such as ASIC and the ACCC can help you design and execute an efficient and effective process; from identification right through to production.

### What do we do?

With a strong Forensic Technology background, McGrathNicol eDiscovery experts can assist you analyse and search devices to locate electronic information that may be of critical importance. Supported by the latest technology, we provide the tools and resources to process large volumes of electronic information to meet the most stringent of deadlines.

All of our electronic discovery services are undertaken in accordance with the Electronic Discovery Reference Model (see over) which provides a common framework for the use of electronic discovery services.

Our team can assist you with any of the following electronic discovery services:

- + assistance in identifying and scoping electronically stored information (ESI);
- + collection and preservation of ESI;
- + analysis, filtering and de-duplication of ESI;
- + processing / rendering of electronic documents into a reviewable format;
- + hosting of data for legal review; and
- + extraction of relevant documents for production (Native, Ringtail, Summation or Concordance formats supported).
