

Dispute Advisory

Commercial disputes and regulatory scrutiny are an everyday part of today's highly competitive business environment. These events are often complex, disruptive and costly. If not managed effectively, they can potentially impact the organisation's value and reputation.

McGrathNicol Forensic Dispute Advisory helps you achieve positive outcomes and minimise disruption by providing hands-on solutions to your complex problems. We can add valuable input to your legal strategy at any stage in the process; from an initial assessment of the financial impact, to an immediate response to regulatory enquiry, through to expert evidence if necessary. We have experience applying these skills in both a Consulting and Expert Witness role.

For examples of our dispute advisory experience in various industries and types of matters please visit mcgrathnicol.com or contact one of our Dispute Advisory Partners:
