

Thank you.

McGrathNicol

Your wish child Daniel

Age: 15 years old

Condition: Haemophilia

Feels so special

Daniel is a 15yr old boy with Haemophilia. Daniel has had this condition since birth, but his family decided to wait until he was older to have his Starlight wish so his wish would be more meaningful for him.

When it came to deciding what Daniel wanted as his Starlight wish it was easy for him to decide. His wish was for a lap top computer. He had always wanted his own computer so he could play games on it, and so it could also help him with his homework and assignments.

Daniel did a lot of research when deciding what computer he wanted and what would best suit his needs. It had to be super fast with loads of memory so he could save his games and photos of his family.

Daniel couldn't believe his eyes when he walked in to a party at his home, with his friends all there to see his wish presented. His wish came true and

he was overwhelmed to find out his lap top wish also included a new desk, chair, printer, games, gaming modifications and accessories, and was already connected to the internet.

"This is amazing- thanks so much".

Thank you McGrathNicol for helping to make Daniel's Starlight wish come true!
