

Forensic Technology

Forensic Technology provides a complete range of services to a broad range of clients including legal firms, corporations and government. Our Forensic Technology practitioners have been involved in some of Australia's most intricate engagements and are amongst the most technically competent and experienced in the country.

Our Forensic Technology team provides suitably trained and qualified forensic practitioners offering a broad range of skills including computer forensics, data analysis, electronic discovery and data hosting services.

We provide our clients with technically excellent Forensic Technology advice and assistance enabling us to provide efficient and legally acceptable services throughout all stages of the investigative or discovery process. Our practitioners are very experienced operating in an environment governed by legal requirements.

We offer a range of forensic technology services in the following key areas:

- + Data recovery;
- + Forensic data analysis;
- + Electronic discovery;
- + Internet network investigations;
- + Compliance reviews;
- + Electronic evidence training;
- + Expert forensic reviews and reports; and
- + Data hosting services.
